

# KELTIC S E R I E S

Providing the widest selection of quality vinyl and aluminum window & door products.

# KELTIC DOOR SERIES

This series is available in multi-slide, pocket doors, 90° corners and custom configurations. All of the door panels easily collapse together, giving you the option to create an opening as large as you can imagine. With quick lead times, quality manufacturing, and a name like International Window... the Keltic Door Series can fill just about any opening.

## Discover the advantages of our Keltic Door Series

**1 to 4 Track One Piece Extrusion** – extruded in one piece with the ability to attach more tracks to add an unlimited number of panels. The possibilities are only up to your imagination. Every unit will utilize a stainless steel track that our **Roll-Xtreme** roller will glide smoothly on every time. All stainless steel tracks are removable and replaceable. Our track system gives you the peace of mind of stainless steel...yet allows you to replace a unit if it ever becomes damaged.

**Hardware** – we took every detail into consideration. Our handle is subtle yet functional. The handle color is satin brushed nickel, and is recessed into the panel. The lock is a multipoint locking system to provide added security. All doors come with a standard external keyed locking system.

**Roll-Xtreme 3" Rollers** – features precision stainless steel ball bearings. These bearings enable the large panels to glide effortlessly and handle the larger sized panels.

**Colors** – we offer 4 stock finishes. **Class 1 Bronze Anodized, Class 1 Clear Anodized, Kynar White and Kynar Mojave Beige Paint.** We are proud to offer these four colors standard to keep lead times at a minimum. Additional finishes available by request.

**Frame** – Multi-Slide and Pocket Doors are Block Frame

**Glass** – the 7880 doors come standard with an energy efficient 1" glass unit. Glass units are manufactured with 1/4" tempered glass and a dual seal technology offering the most efficient unit with the promise of IG Unit dependability for years to come. Spacer available in bronze or silver.

**Above Grade Sills Pans (Standard 3/4" Full Pan System)** – we offer a wide variety of drainage pans with custom heights available. Sill pans are included with flush mount sills.

**Available in a fixed Picture Door**

## Motorized Door System

**Available in Motorized Door System** – designed to open large doors with the touch of a button. This product is intended to work with a variety of door sizes, styles, and configurations. With automatic doors, homeowners can easily take advantage of their stunning views and incredible weather. Automation is available for all of our Multi-Slide Series.

### Flush Mount Track

Each Track Width is 1 15/16"

### Recessed Track

Each Track Width is 1 15/16"

**1 to 4 Track One Piece Extrusion (Up to 4 tracks, all in one extrusion)** – extruded in one piece with the ability to attach more tracks to add an unlimited number of panels. The opportunities are endless. (Flush Mount Only)

## The Keltic 7223 Series Commercial Hinged Windows

Casements • Awnings • Hoppers • Fixed windows

The Keltic 7223 Series Commercial Hinged Windows utilize top-of-the-line “Heavy Duty 4-bar Friction Hinges” which ensures smooth operation. These windows also feature the AZON’s MLP™ (Mechanical Lock Profile) thermal break total design system to improve thermal performance. When energy efficiency and optimal ventilation are a priority, the 7223 is perfect for your next residential or commercial property project.

### Heavy Duty Friction Hinges

The Heavy Duty Friction Hinges have been designed to be used for residential or commercial projects.

# KELTIC 7223 - Thermally Broken Aluminum Windows Horizontal Sliding & Single-Hung

The Keltec Series 7223 aluminum horizontal sliding window has many of the same impressive characteristics as our 7223 single hung. Options such as 1" dual glazing and 1 1/8" triple glazing are available enhanced thermal performance while also providing sightlines that blend with today's contemporary architectural styles.

**Locked**

**Unlocked**

### Sleek Low Profile Latch

This new window latch is designed with one simple operation and has a sleek, low profile design for a streamlined look. When the latch is aligning, the window is locked. When the latch is tilted to the side, the window is unlocked. This means the window lock is difficult to view from outside, creating a streamlined look and increased security.

### Highly Efficient Weep Hole System

The weep hole system allows any water entering the space between window sash and frame to drain safely to the outside and also helps reduce dust infiltration.

## KELTIC 7223 SINGLE-HUNG

### KEY FEATURES

- Double thermally broken frame
- 1" dual glazing and 1 1/8" triple glazing available
