SOLIDOOR™

DURABLE | SOLID | ECO-FRIENDLY

Bring tranquility to your home with durable,

solid core interior doors from Masonite.

Engineered to be environmentally friendly,

Solidoor™ Doors offer true peace of mind.

SOUND
MATTERS

SURVEY SAYS...

When given a choice between Safe 'N Sound® or hollow core doors,

100% OF CUSTOMERS PREFER SOLIDOOR™.*

Ask your representative how to upgrade to a Solidoor™ door.

*Qualitative research conducted in 2013.

- **5-year** warranty
- Solidoor™ doors **quiet a home** more than hollow core doors
- Offers the **durability, heft & feel of real wood**
- Solid core doors **add more resale value to a home** than standard hollow core doors
- 20-minute fire rated options with 1-3/4" thickness
- **Green at Heart:** the core of our Solidoor™ door is engineered from wheat straw, an annually renewable resource

HOW TO MEASURE

Un-Machined Door (Fig. 1):

- A. Measure widest side of your existing door (1-A).
- B. Measure door height (1-B).

Door (Fig. 1)

Pre-Machined Door (Fig. 2):

- A. Measure widest side of your existing door (2-A).
- B. Measure door height (2-B).
- C. Measure from top of door to top of first hinge (2-C).
- D. Measure from top of door to top of middle hinge (2-D).
- E. Measure from top of door to top of bottom hinge (2-E).
- F. Measure from top of door to center of lock hole (2-F).
- G. Measure from edge of door to center of lock hole (2-G).

(Fig. 2)

Prehung Door (Fig. 3):

Measure the width of your existing door jamb.
Measure the existing rough opening:

- A. To ensure accurate measurements, first remove the casing on the sides and top of your opening frame.
- B. Measure from inside the face and of one stud to inside the face of the other stud (3-A).
- C. Measure from the floor to the bottom of the header above the door (3-B).
- D. Indicate door swing L/H or R/H.

Rough Opening (Fig. 3)

Bifold (Fig. 4):

If you have an opening in the wall that already has the casing and the door frame in place (also applies to openings that have finished drywall):

- A. Measure the width in three different areas of the finished opening (4-A) and write down the smallest of the three measurements.
- B. Measure the height in three different areas of the finished opening (4-B) and write down the smallest of the three measurements.

Finished (Or Cased) Opening (Fig. 4)

Masonite “green” doors meet strict requirements qualifying these doors as FSC certified and contributing to “green” certifications including LEED® and NAHB National Green Building Program™, plus other local and regional environmental initiatives.

SOLIDOOR™

Masonite’s environmentally responsible Solid Core Solidoor™ interior door is manufactured with DorCor®, an essential ingredient in making this product “green.” DorCor is a low density fiberboard made from wheat straw, an annually renewable, agricultural, wheat by-product.

(1-3/8" & 1-3/4" thickness) available in 20-minute fire-rated option with 1-3/4" thickness

SOLIDOOR™

The Emerald Solid Core Solidoor (ESNS) uses the same DorCor ingredient as the Solidoor with the added attributes of being Forest Stewardship Council (FSC) certified and containing No Added Urea-Formaldehyde.

HOLLOW CORE

The Emerald Hollow Core (EHC) door is the perfect “green” solution for budget-minded customers.

(1-3/8" thickness)

A BLUEPRINT FOR EXCELLENCE

Masonite's Wood Door Collection boasts a variety of high-grade wood species, precision handcrafted using vertical stiles and horizontal rails in your choice of panels and glass, ready to stain or paint.

design flexibility Stile & rail construction offers virtually limitless door styles, configurations, panel and sticking profiles.

hand-crafted engineering Stile & rail door construction has distinct joinery and better depth and definition. This results in crisp, clean lines that are architecturally correct. Each door is crafted by hand, ensuring a perfect fit.

enhanced stability Because stile & rail doors are built with separate components, the door parts can naturally contract and expand with ambient humidity changes without warping or bending. This is a significant improvement over door manufacturing that involves routing out or stamping a solid piece of wood that is prone to warping. Engineered wood materials are used to enhance structural and environmental performance.

PANEL/STICKING OPTIONS

STILE & RAIL DOORS DEFINED

MULLION: narrow vertical sections between panels **MUNTIN:** slim vertical pieces used to separate panes of glass; grille bar **PANEL:** pieces that fit within the surrounding stile & rail frame that come in different profile designs – single-hip, double-hip and flat **RAIL:** horizontal pieces of the door; includes top, bottom and sometimes lock rails **STICKING:** the design of the profile edge on the stile and rail; ovolo is carved and rounded; shaker is straight and squared **STILE:** vertical pieces of the door.

GLASS WRAP

Masonite's unique Glass Wrap feature on its French doors with wood muntin bar dividers makes finishing a snap. Glass Wrap means each pane of glass is enclosed in shrink-wrapped plastic, making staining, sealing or painting of the door much simpler and cleaner. After finishing, simply use a sharp blade or knife to cut away the plastic wrap, leaving you with clean edges around the lites.

*Thinner outer stile will not affect functionality. Double doors and bifolds are not recommended. Due to manufacturing processes, a 1/8" tolerance is acceptable on horizontal lines. Note: 48", 60" & 72" bifolds are achieved by doubled 24", 30" & 36" bifolds.

Molded Panel Series & Masonite Select™ Collection Notes: Please note that some sizes are only available as a result of being trimmed from a larger facing. The trimming process may result in a stile width that is too narrow to accommodate a standard bore. To machine a standard bore with a 2-3/8" backset on the lock hole and a 2-1/8" diameter bore, the outer stile measurements must be no less than 3-7/16" wide. Many facings have a lockrail that will accommodate a standard bore even when the stile width is too narrow. Please refer to Masonite Molded Door Facing Dimensional Specifications to verify the outer stile measurements or contact your Masonite Interior Door servicing plant. Textured refers to embossed woodgrain. Not all molded panel designs and sizes are available in all regions as stock products. Please check for special order availability. *Molded Panel actually measures 1'7-13/16".
